Patient Appointment Scheduling

Appointment Scheduling for Today's Progressive Practice

The AppMed Patient Appointment Scheduling program is a complete and yet flexible application. This program allows for multiple locations and multiple doctors centralized into a single operational data structure. AppMed PAS binds billing and EMR to create a harmonized flight of applications for your practice.

The screen sample to the left shows an example of the day view in the patient appointment scheduler. There is also a week view and month view.

This view shows the office opens at 8:00am and Dr Rogers begins his day at 10:00 am.

The upper left shows a summary for the 8:30am appointment for Dr Laslo in column 1.

Each appointment can be color coded by appointment category.

You can move to another day by clicking the date on the calendar on the left side.

The screen sample to the right shows an example of the appointment detail for the 8:30am appointment for the patient George Foreman for Dr. Laslo in column 1.

By double clicking on the appointment, this screen appears.

This screen allows you to modify or move an appointment, add and read more extensive appointment notes, verify both that the appointment was confirmed and if the patient arrives for the appointment.

You can also view insurance coverage, recent financial activity and which employee made or last modified the appointment.
